

LINK LOGISTICS SERVICES

LINK Logistics Services was established in Istanbul in 1996 to provide services in the fields of sea, road, air, railway and tank container transportation. Ever since its foundation; it has adopted the principle of providing the fastest and the most accurate services by making investments in the latest technologies and professional employees.

LINK currently continues its competent services with its Ship Agency Authorization Certificate awarded by the Undersecretariat of Maritime and R1, R2, K1 and TIO (Transport Works Organization) Authorization Certificates awarded by the Ministry of Transportation and Infrastructure.

SEA TRANSPORTATION

Based on the excellent service concept; LINK Logistics Services provides the most suitable transportation solutions to meet the logistics needs of export and import companies. In addition to import and export transportation; it also has vast experience in transit loading service and cross-trade shipments between third countries.

We, as LINK Logistics Services, perfectly manage all processes of your shipments from the point of departure to the point of destination through our wide network of over 200 agencies around the world, experienced staff and reliable partners, and we ensure time and cost efficiency thanks to our flexible and creative solutions. We are a leading organization in the sector to help you optimize your logistics processes, with our reliable service quality, customized service concept and competitive prices.

Our Sea Transportation Services:

- FCL (Full Container Load)
- LCL (Less than a Container Load)
- Special Equipment Options
(Open Top, Flat Rack, Reefer Container)

LINER AGENCY SERVICES

LINK Logistics Services has been acting as the liner agency of MARGUISA Shipping Lines, a company based in Spain, since 1999. We provide weekly services from main Turkish ports to Equatorial Guinea and the other main ports in West Africa.

ROAD TRANSPORTATION

LINK Logistics Services always offers the most effective solutions to meet your domestic and international road transportation needs. It provides international road transportation services with its wide network of suppliers and agencies around the world.

To provide impeccable services in all relevant processes for your shipments; we present the opportunity of centralized tracking and finalization of all processes from the supply of trucks to T1 opening / closing / issuing services.

Our Road Transportation Services:

- Full truck load services (FTL)
- Less-than-truckload services (LTL)
- Temperature-controlled transportation
- Heavy and oversized cargoes
- Express transportation
- Hanging garment transportation
- Truck registration

COMBINED TRANSPORTATION

Intermodal Transportation

For our customers, we ensure easy transportation for intercontinental distances thanks to our professional staff and wide network of agencies. We provide cost-effective, time-saving and environmentally-friendly transportation services with our Intermodal transportation solutions which involve multiple transportation modes. We ensure timely delivery of your shipments by creating the most efficient mode configurations without handling your products within the transport unit.

With our Intermodal transportation services;

- We help you save on costs and time by combining the wide transportation network benefits of sea, railway, road and air transportation in the most efficient way.
- We ensure centralized tracking and transport of your cargoes from the point of departure to their final destination.
- We offer an environmentally-friendly transport model that minimizes carbon emission.

Multimodal Transportation

With our Multimodal transportation services; we combine different transportation modes in the most efficient way and transfer your cargoes from one transport unit to another transport unit safely. We manage your handling and transportation operations in a more flexible, smooth and time-efficient way, ensuring strategic cost benefits for your long-distance shipments and optimizing all your logistics processes.

Our expert team is always at your disposal to enable you to benefit from all advantages of multimodal transportation.

- Your logistics needs are analyzed excellently.
- The most efficient transportation mode configurations are created.
- The best route that will ensure time efficiency is chosen.
- Transfer and handling operations of your products are completed safely.
- Cost benefits are provided.

LIQUID AND GAS TRANSPORTATION

We are proud of representing the leading tank operators in the sector in the international arena. We ensure safe transportation of your products with our chemical, food and gas tanks of various capacities, and provide heating, washing and storage services.

Our Equipment:

ISOTANK:

We provide the most suitable equipment that meets the special needs of each sector with our tank containers of different types and capacities.

- Chemical Tank:

We provide impeccable service quality for liquid chemical producers with our stainless-steel tank containers having 10.000-to-26.000-liter transport capacity.

- Food Tank:

We provide domestic and international transportation services with our Food Grade tanks that are dedicated to food and beverage industry. Our Food Grade tanks are available as an alternative solution for your storing needs.

- Gas Tank:

We provide services for the transportation and storage of various gases in accordance with health, safety, environmental and quality standards.

FLEXITANK:

Flexitank is a multi-layered packaging material that ensures the transportation of non-hazardous liquid materials within container and truck. We provide services with our product ranges having 12000 liters to 26000 liters capacity.

ROAD TANKER:

We provide national and international road transportation services with stainless-steel ADR road tankers having up to 38.000 liters capacity depending upon the product ranges of our customers.

Our Additional Services:

Heating Services: We provide tank heating services by using three different methods as electric heating, steam heating and hot water heating.

Storage Services: We ensure bonded and non-bonded warehousing services for tank containers with hazardous and non-hazardous products.

Cleaning Services: We conduct tank cleaning services in accordance with the requirements of the relevant international standards and provide an EFTCO-approved cleaning certificate, after the completion of the cleaning service.
